European Research Council
Established by the European Commission

Frontier research grants

- To increase proportion of funding for StG to try to achieve more equal success rates between StG and CoG.
- For the first time under Horizon 2020, beneficiaries of ERC frontier research grants funded under WP 2017 will automatically be covered by the provisions on research data sharing as set out in Article 29.3 of the ERC Model Grant Agreement unless they specifically decide to opt-out.

Frontier research grants

- Highlight need to take all measures to promote equal opportunities between men and women and aim for a gender balance of personnel assigned to the action.
- For maternity, the effective elapsed time since the award of the first PhD will be considered reduced by 18 months or if longer by the documented amount of leave actually taken for each child born before or after the PhD award.

Draft ERC Work Programme 2017

In addition, for the first time under Horizon 2020, beneficiaries of ERC frontier research grants funded under this Work Programme will automatically be covered by the provisions on research data sharing as set out in Article 29.3 of the ERC Model Grant Agreement unless they specifically decide to opt-out. Beneficiaries that do not opt-out should also ensure appropriate management (including preservation and curation) of the research data they generate in order to ensure its sustainability. These provisions are designed to facilitate access, re-use and preservation of research data generated during the ERC funded research work.

Beneficiaries should carefully check the additional obligations related to open research data contained in Article 29.3. They may opt-out of the provisions of the previous paragraph at any stage before or after the signature of the grant agreement, thereby freeing themselves from the associated obligations.

Change to the Budget table for AdG2016 (and foreseen for 2017 calls onwards)

In case you are requesting additional funding above the normal EUR 2 500 000, fully justify your request by filling in the table below.

ERC Funded Projects

The ERC operates according to a "curiosity-driven", or "bottom-up", approach, allowing researchers to identify new opportunities in any field of research. Accordingly the portfolio ERC funded projects spans a wide range of topics and research questions.

Since 2007, more than 6,500 projects have been selected to receive ERC funding throughout the EU Member States and the associated countries. The ERC has received over 62,000 project proposals for its calls.

Use the search facility to quickly and easily find examples of ERC funded projects.

How can you search?

Projects can be filtered according to funding scheme, call year, research area (panel ) / domain ) and/or country of host institution .

You can also use the search box and enter free text words, for instance names of universities or principal investigators.

Where does the data come from?

Information displayed is automatically updated through the information available on the **CORDIS** platform and can partially be exported in PDF format.

Only funded projects, whose grant agreements have been signed, appear in this section.

Please note that the structure and descriptions of ERC panels have changed over the years. The panel  structures for each year can be found in ERC annual work programmes. Panels displayed in this tool are the panels the projects were selected in.

More information

Check also the **Statistics** page for data on all evaluated proposals and projects selected for funding, including when grant agreements are not signed yet.

For specific queries, you can use the **contact form** (select 'Web').

Data Protection

Individuals' personal information contained in this database is published for information concerning their involvement in an ERC project. It shall only be used to contact them for matters related to their function. Evaluation Panels

Tweet 18

The selection of scientific and scholarly proposals for ERC funding is based on international peer review with excellence as the sole criterion. The ERC uses a typical panel-based system, in which panels of high-level scientists and/or scholars make recommendations for funding.

Domain and panel structure

The ERC panel structure consists of 25 panels.

The panels of each grant are grouped into three disciplinary domains that cover the entire spectrum of science, engineering and scholarship:

1. Social sciences and Humanities (SH)
2. Life sciences (LS)
3. Physical and Engineering Sciences (PE)

Research proposals of a multi and inter disciplinary nature are strongly encouraged throughout the ERC's schemes. Proposals of this type are evaluated by the ERC's regular panels with the appropriate external expertise.
