In the insurance industry:

<u>1. DIRECT WRITERS</u>: have their own sale force that primarily sells the company's products

The insurance company owns <u>the list of</u> <u>policyholders</u>

(client list)

(the agent has no right to renew the insurance policy with a different company)

2. NOT DIRECT WRITERS

sell insurance through <u>independent agents and</u> <u>brokers</u>

The independent agent owns <u>the list of</u> <u>policyholders</u>

(an independent agent can sell the product of any insurance company to his clients)

I control → (The insurance company has the residual rights of control)

A control→ (The independent agent has the residual rights of control)

Nonintegration has non meaning (it actually coincides with A control)

 The agent devotes efforts that is not verifiable (by the insurance company) to acquiring and keeping clients.

(probability of renewing the insurance contract by the client: Temporary vs persistent clients)

Examples of effort:

- The care with which the agent adapts the initial policy to the client's needs
- The efficiency with which he deals with a claim once the policy is in force.

This effort yields dividends in the future.

• For example, a claim dealt with speedily today is likely to induce the client to renew next year and the year after.

Just one asset → the list of policy hoders

• Main investment of the company: building the list

• Main investment of the agent: delivering persistent clients.

Property rights ASSIGNMENT 1 WHOLE LIFE INSURANCE

- A life insurance policy involves a long-term contract
- Are renewals sensitive to the agent's actions?

Property rights ASSIGNMENT 1

Which is the most suitable kind of regime? (the best allocation of the residual rights of control)? *Insurance control* or *Agent control*?

Try to answer and remember that we are talking about PROPERTY RIGHTS THEORY

Remember:

Marginal benefits of the investment are increasing under the control

Property rights ASSIGNMENT 2

AUTOMOBILE INSURANCE OR FIRE INSURANCE

Insurance policies that may involve short-term contracts

• Are renewals sensitive to the agent's actions?

Property rights ASSIGNMENT 2

Which is the most suitable kind of regime? (the best allocation of the residual rights of control)? *Insurance control* or *Agent control*?

Try to answer and remember that we are talking about PROPERTY RIGHTS THEORY

Remember:

Marginal benefits of the investment are increasing under the control
