# Lab using R

Profiling countries
by their food consumption

Research questions:

Can we profile countries categories observing their food consumption? What results we may achieve?

Database:

eating

Method:

Cluster Analysis

Please, perform the analysis and write-up a small dissertation on the topic and results

Example

in a word document set up all the following sections

- Title
- Contents
- Introduction (contextualizing the issue)
- The dataset
- The research questions and the variables of interest
- The statistical method applied
- Discussion of the main results and comments
- Final conclusions
- *Appendix = script and commands' description*
- References
