

Food processing: packaging

Emilia-Romagna is leader in Italy and internationally in the automatic wrapping and packaging machinery sector. At a national level, it represents about 50% of the enterprises and 70% of the turnover of the sector

It is a solid industry founded on a district-based organisation, strong relationships with the international markets and knowledge and innovation. Indeed, depending of size, the enterprises of the sector invest between 3% and 7% of their turnover on R&D

BRICST
2011-2013

INDIA

Mechanics International Platform (MIP)

GENERAL AIM

To provide enterprises operating in the mechanic sector and more internationally oriented, as well as their subcontractors, a strategic point of reference in support of their decisional processes
