SUICIDE: A GENDER PHENOMENON?

Facoltà di Medicina, Farmacia e Prevenzione
Sezione di Neurologia, Psicologia e Psichiatria
Dip. Scienze Biomediche e Chirurgico Specialistiche
Prof. Stefano Caracciolo

Suicide and Gender:

In most Western countries females have higher rates of suicidal ideation and behavior than males, yet mortality from suicide is typically lower for females than for males. The realization that cultural influences play an important role in the gender paradox of suicidal behaviors holds important implications for research and for public policy.

Silvia Sara Canetto

Ph.D., Professor, Dept. of Psychology, Colorado State University (USA)
