

## PROGETTI DI RICERCA DI INTERESSE NAZIONALE PRIN 2020: PROGETTI AMMESSI AL FINANZIAMENTO

RESPONSABILE SCIENTIFICO	TITOLO PROGETTO
DE FRANCESCHI Alberto	Digital Vulnerability in European Private Law
CAPUTO Riccardo   PI	Fault segmentation and seismotectonics of active thrust systems: the Northern Apennines and Southern Alps laboratories for new Seismic Hazard Assessments in northern Italy (NASA4SHA)
ROSATI Piero	GRAAL: GRAvitational lensing in galaxy clusters next-generation proposAL
DIMARCO Giacomo	Integrated Mathematical Approaches to Socio-Epidemiological Dynamics
PINTON Paolo	Biochemical mechanisms and cellular consequences of mitochondrial cation flux: from bioenergetics to metabolic rewiring
BARBUJANI GUIDO	Pompeii: A Molecular Portrait
GHIROTTTO Silvia   PI	Crossing the Sea: ancient and modern human genomes to study the evolutionary dynamics of Sicily, Sardinia and Corsica.
NATALI Mirco   PI	Combined Electrochemical and Light-Driven Processes for the Sustainable Synthesis of Added-Value Molecules (ElectroLight4Value)
PACIFICO Salvatore	Early Phase Preclinical Development of PACECOR, a Mutation-Independent Anti-SARS-Co2 Therapeutic Strategy
STAZI Silvia Rita	Soil biodegradation of nutrients enriched cellulose- and chitosan-derived mulching films for sustainable horticulture (Acronym: MULCHING+)
TRILLO Stefano	Extreme waves emerging in full 2D+1 dimensional environments
FEDERICI Eleonora	Destination Italy in English Translation and Language over the Years (DIETALY)
ROCCATAGLIATI Alessandro	How They Used to Sing Verdi
FADIGA Luciano   PI	The Neurophysiological Bases of Biological Motion: From Laboratory to Clinics
