CURRICULUM VITAE
BRUNO CAVAROCCHI

ABOUT ME

I'm an Architecture student, trained to group work and design processes.
In my freetime I have many interests, like creative productions such as drawing,
storytelling, graphical representation, playing team sports.

EDUCATION AND TRAINING

[2013 – 2018] High school degree

Liceo Scientifico Enrico Fermi   https://www.liceofermibo.edu.it/

Address: Via Nazionale Toscana 1, Via Mazzini 172/2, 40063, Bologna (BO), Italy

[2018 – Current] Single-cycle Master's Degree in Architecture

Università degli Studi di Ferrara   http://www.architettura.unife.it/it

Address: Via della Ghiara 36, 44121, Ferrara, Italy

ADDITIONAL EXPERIENCE

[2010 – Current] Scouting

Pianoro's scouting group

City: Pianoro (BO)

Country: Italy
Main activities and responsibilities:
The Scout group is a community lived by people of different ages, sharing spaces and
interests to grow together. We base activities on giving the group progressive objectives
and trying to complete them by a pre-set organisation, making the teen-agers able to
deal with being active and conscious about success and failure.
In practical terms I'm part of a 5 people team organising activities and meetings,
managing a group of 8 teen-agers each to make them be the protagonists of their
experience in the communiy.

[2015 – 2018] School internship "alternanza scuola-lavoro"

Liceo Scientifico E. Fermi

City: Bologna

Country: Italy
Main activities and responsibilities:
I spent most of the 150 hours dedicated to working stages, that every student had to
experience within the last three years of high school, in voluntary associations. In details,
between 2016 and 2017 I experienced working with ANT (Associazione Nazionale
Tumori), delivering and picking up orthopedic aids for elders. During 2017-2018 school
year I spent the last 70 hours in AUSER (Associazione per l'autogestione dei servizi e la
solidarietà), an association with an headquarter located in Pianoro, organising and
contributing in local events.
