

# MORFOLOGIA DENTALE

---

## Incisivo centrale superiore

Labiale

Linguale

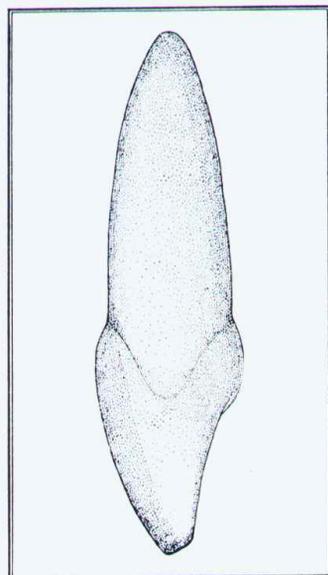

**cingolo**

**fossa  
linguale**

**forame  
cieco**

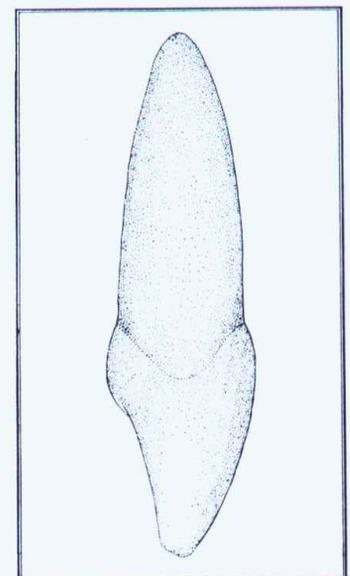

Incisale

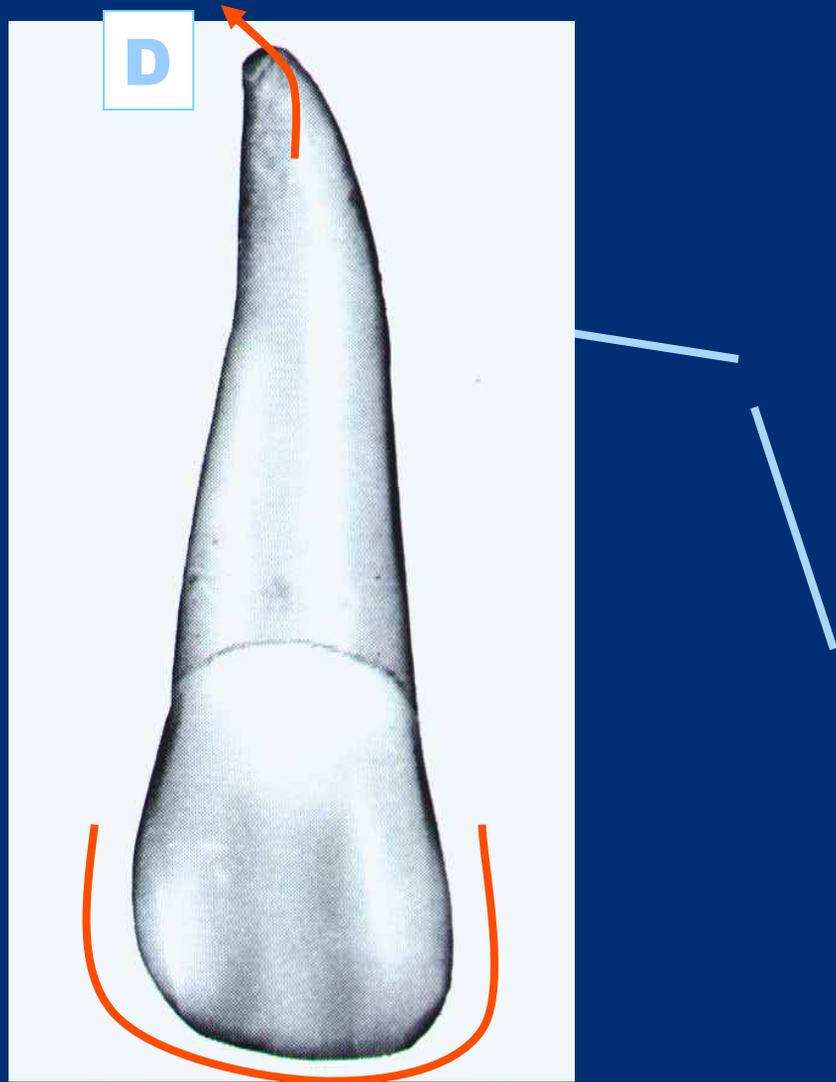

Mesiale

**forma a pala  
o a scalpello**

Distale

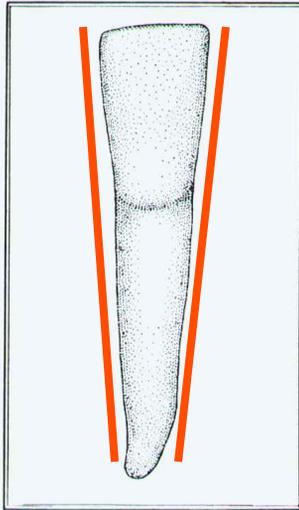

# Incisivo laterale superiore

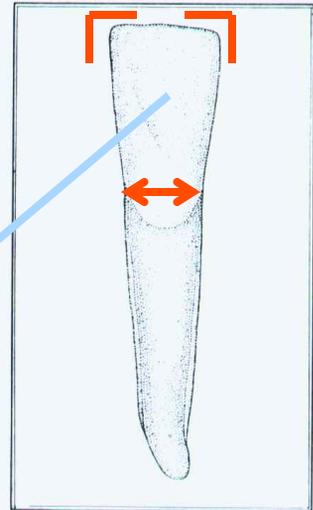

**Corona: più piccola in tutte le dimensioni**

**Radice: lunghezza simile**

## Incisivo centrale inferiore

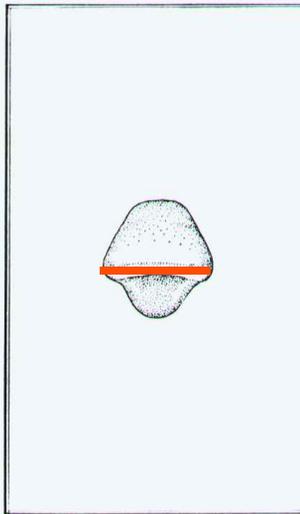

Labiale

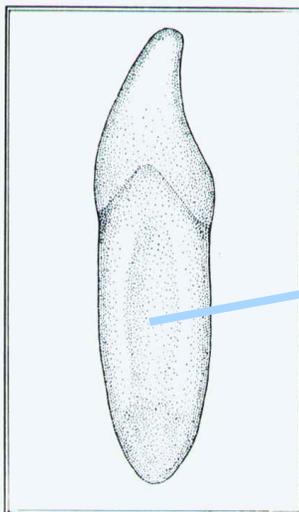

**fossa  
linguale**

Linguale

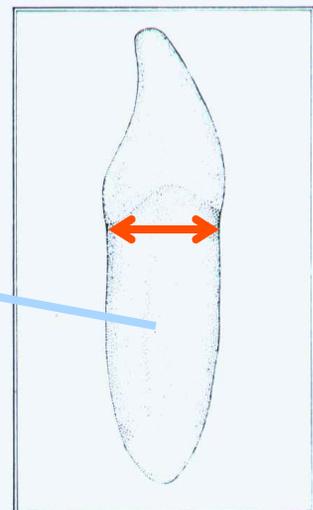

Incisale

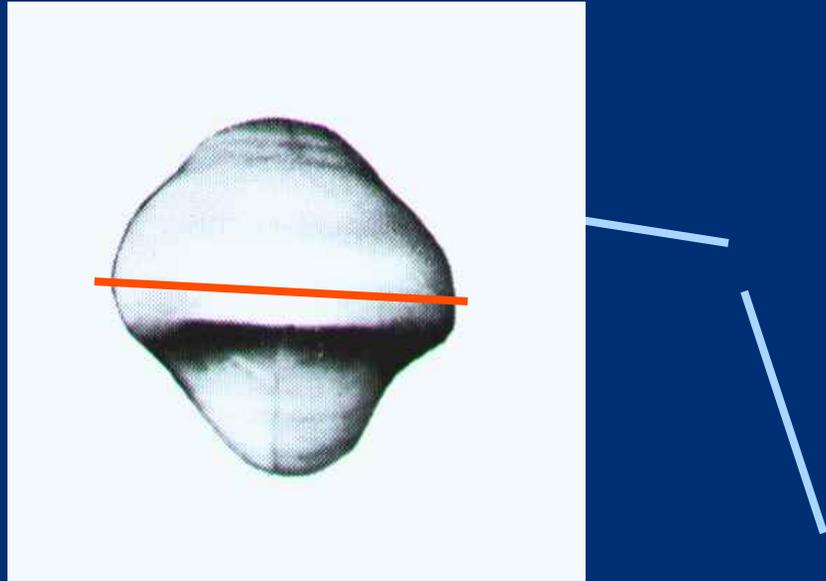

Mesiale

**depressioni**

Distale

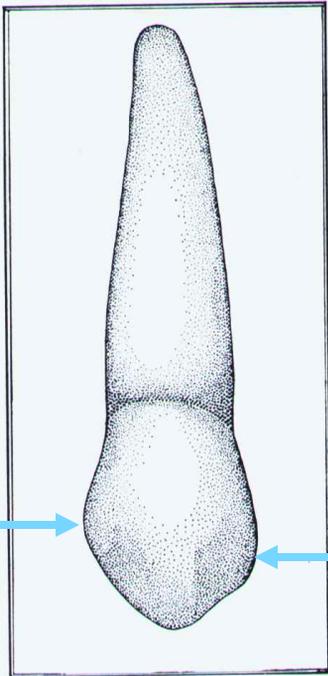

# **Incisivo laterale inferiore**

**Forma simile ma dimensioni maggiori**

**Il margine incisale segue la curvatura dell'arcata (corona ruotata sulla base radicolare)**

## Canino superiore

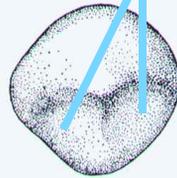

Labiale

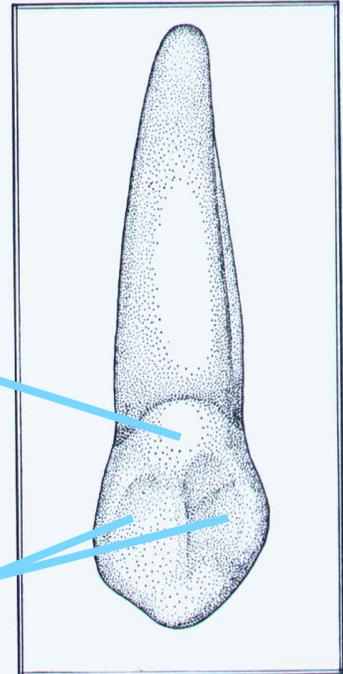

**1 cuspid**

**cingolo**

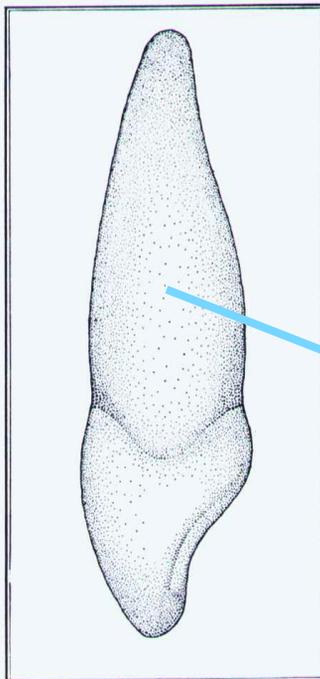

**fosse  
linguali**

Incisale

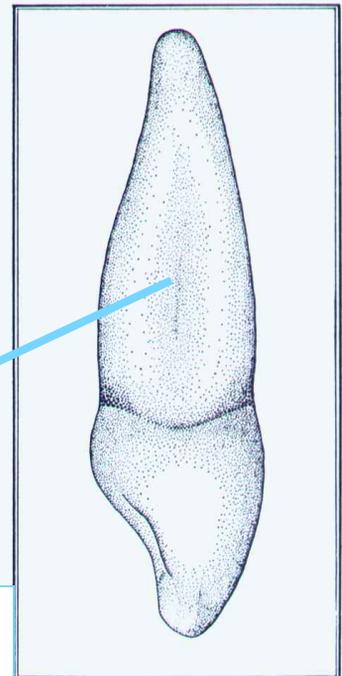

Linguale

Mesiale

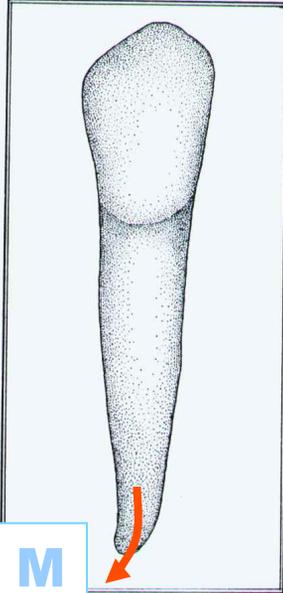

**depressioni**

**forma a cuneo**

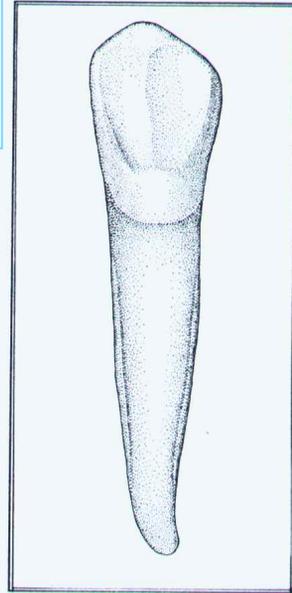

Distale

## Canino inferiore

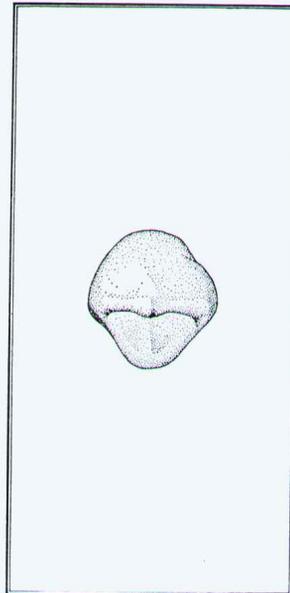

Labiale

**cuspidate meno sviluppata**

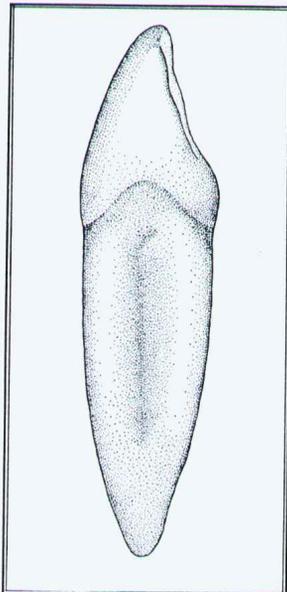

Linguale

**dimensioni M-D minori**

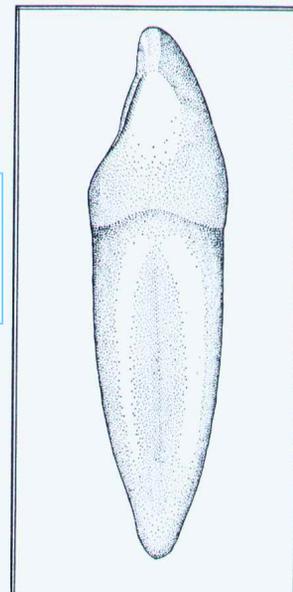

Incisale

**radice più corta**

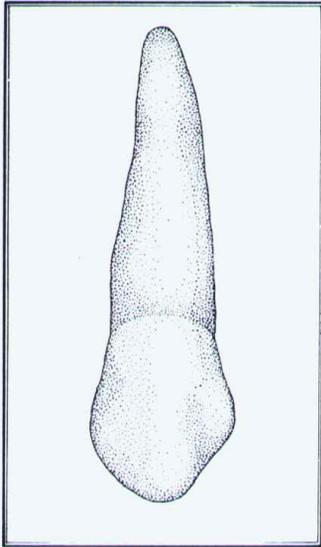

Mesiale

**cingolo meno sviluppato**

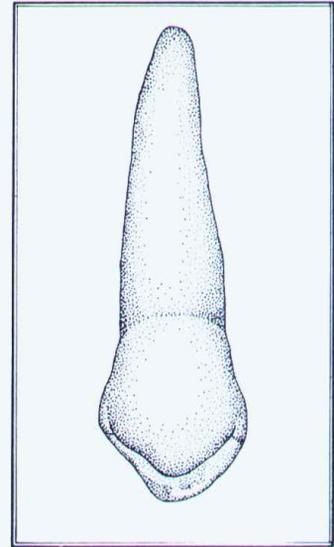

Distale

## Primo premolare superiore

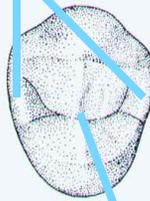

Buccale

Linguale

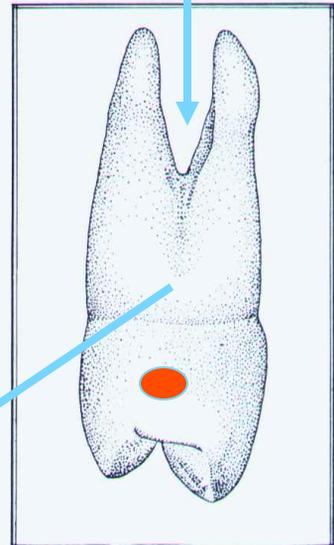

**creste  
marginali**

**solco  
centrale**

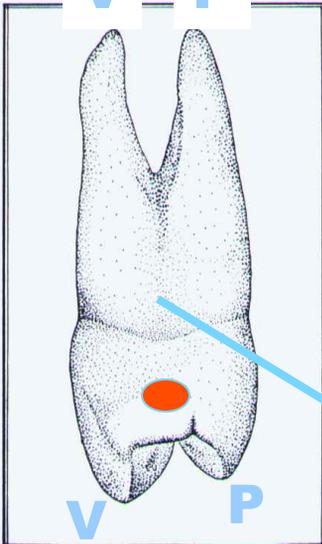

Occlusale

**forcazione**

Distale

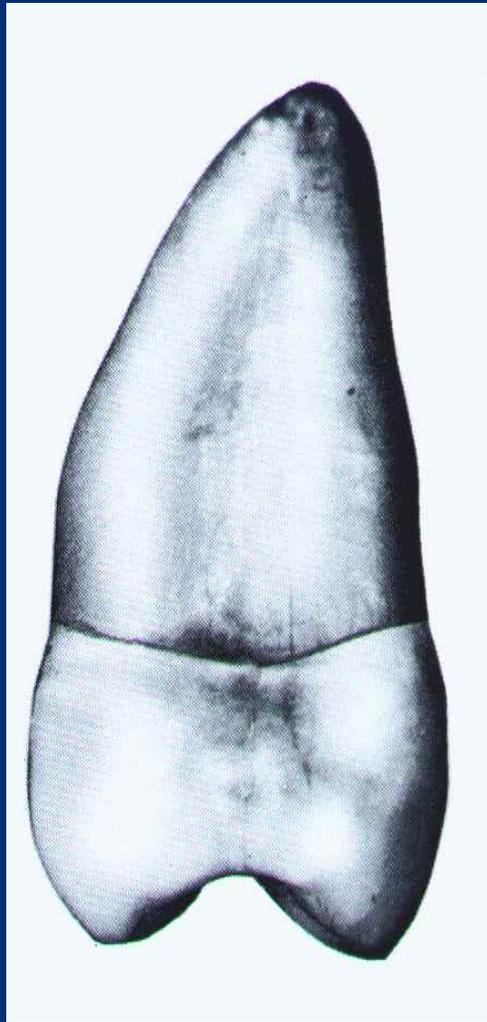

**V P**

Mesiale

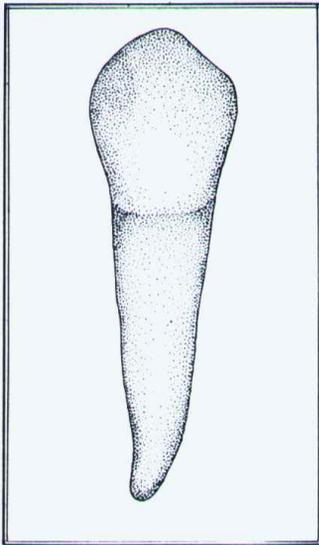

**depressioni**

# **Secondo premolare superiore**

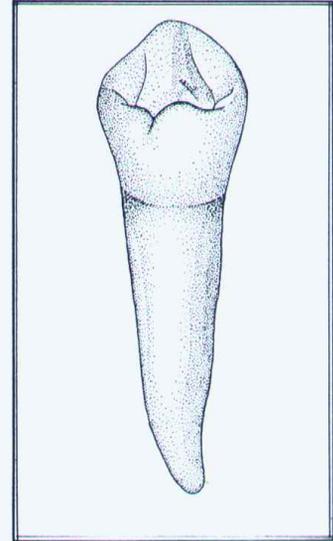

**Forma simile**  
**Dimensioni variabili**  
**Corona più arrotondata**  
**Radice unica**

## Primo premolare inferiore

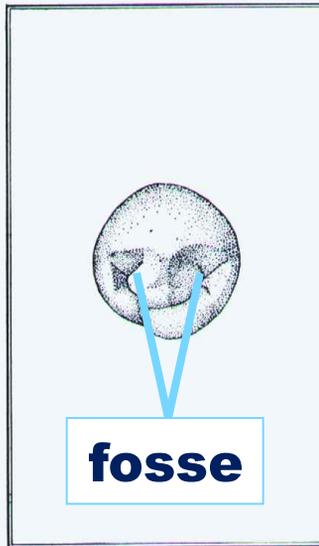

Buccale

**2 cuspidi**

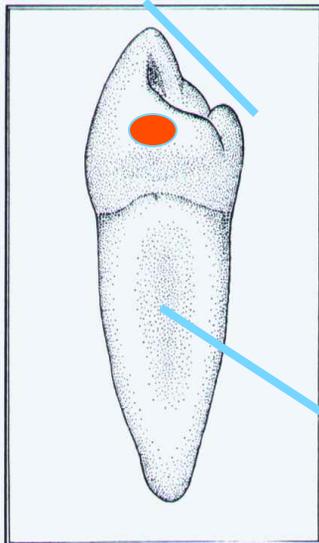

Linguale

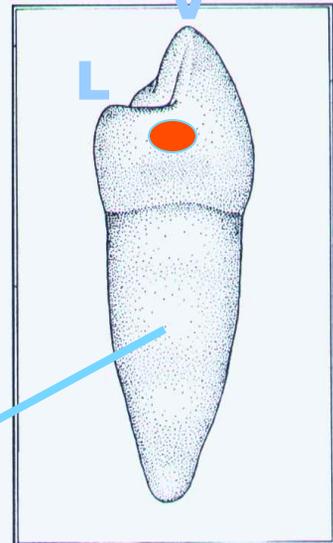

**fosse**

Occlusale

Mesiale

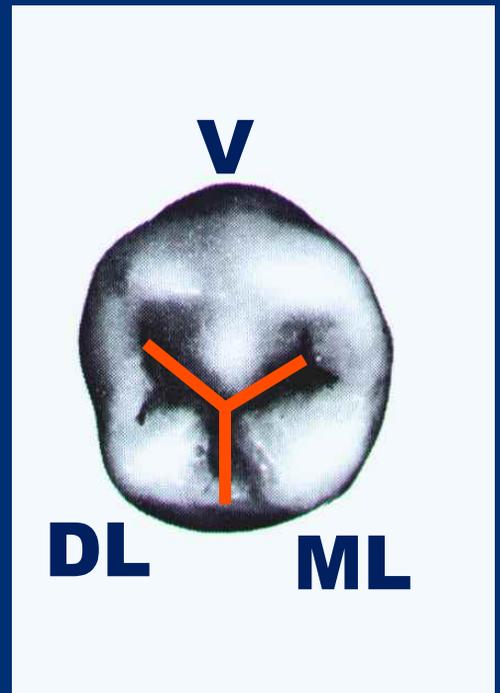

**depressioni**

Distale

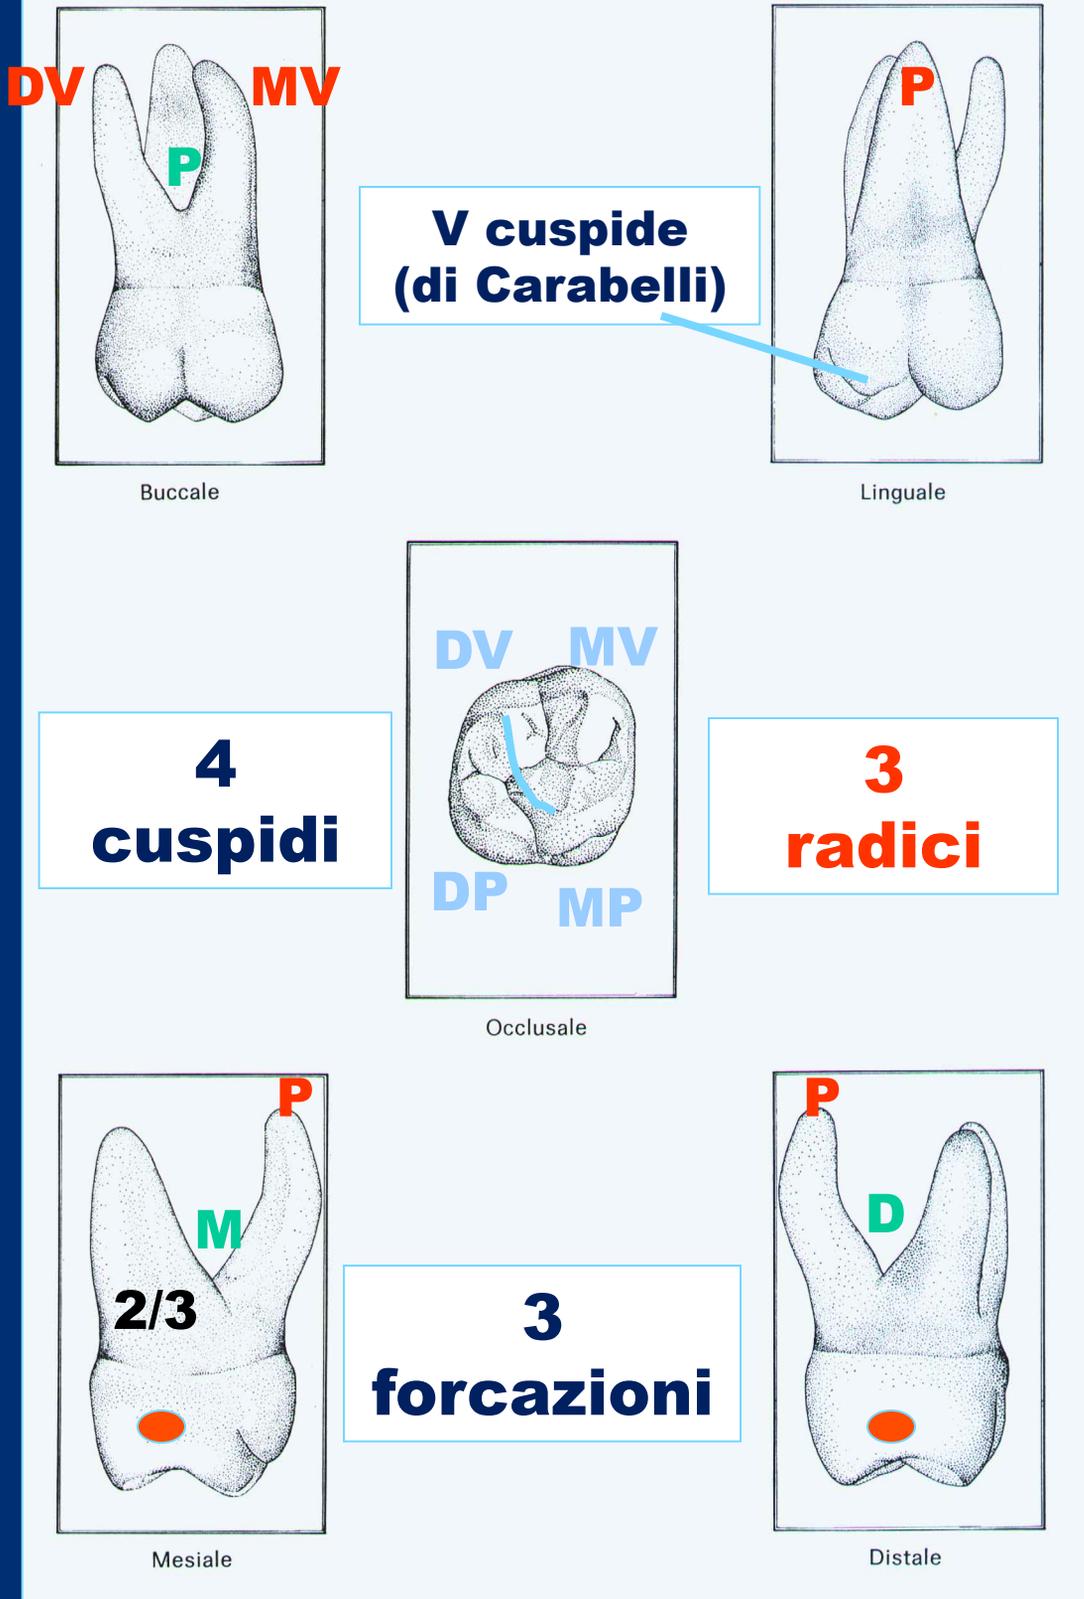

# Secondo premolare inferiore

**3 cuspidi**

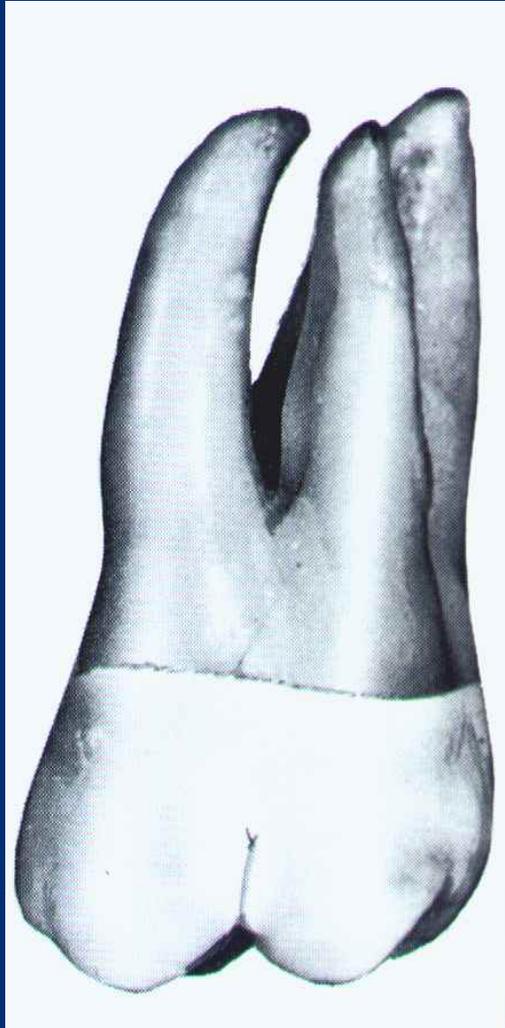

# Morfologia dei denti permanenti

## Primo molare superiore

# **Secondo molare superiore**

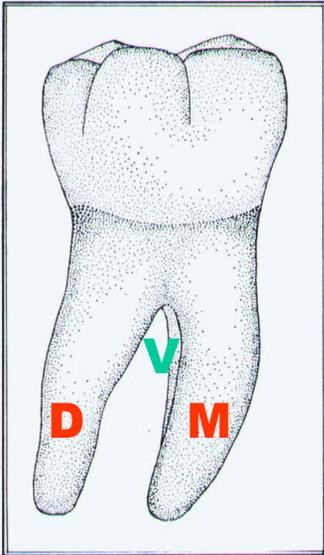

**Le 2 cuspidi distali  
sono meno sviluppate**

**Non è presente la V cuspid**

**Radici meno divaricate**

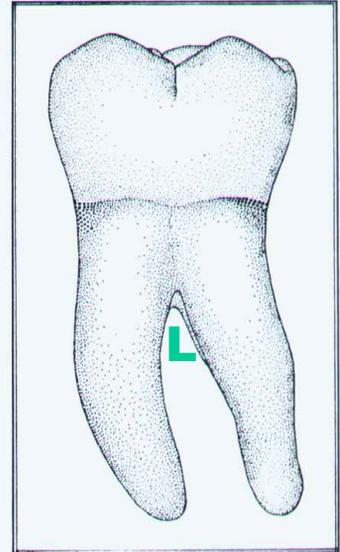

# Morfologia dei denti permanenti

## Primo molare inferiore

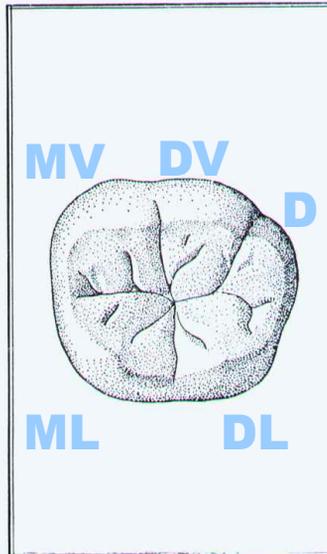

Buccale

**2**  
**forcazioni**

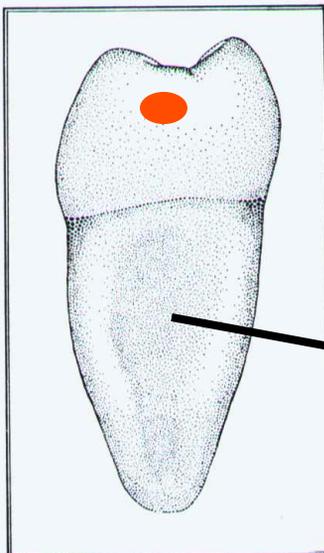

Linguale

**5**  
**cuspidi**

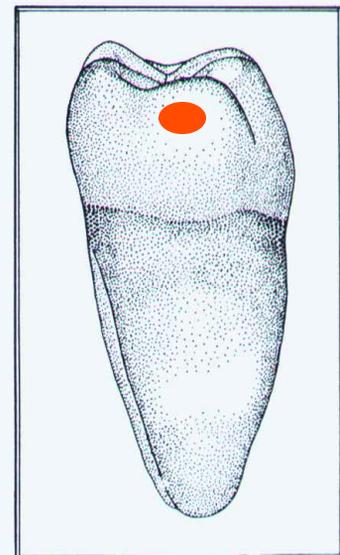

Occlusale

**2**  
**radici**

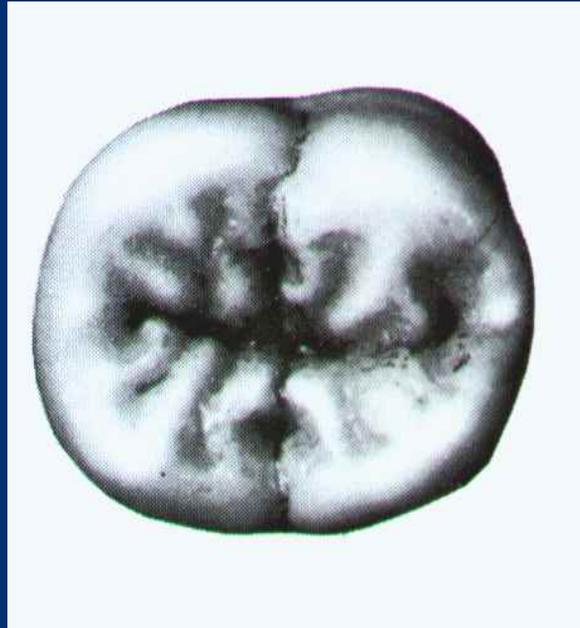

Mesiale

**depressione**

Distale

# **Secondo molare inferiore**

**Forma e dimensioni simili**

**Non è presente la cuspid D**

**Radici meno divaricate, a volte fuse  
per tutta o parte della lunghezza**
