

Inverse Problems and Applications

(Workshop in honour of Mario Bertero)

2nd February 2011

DISI - University of Genova
Conference Room 3rd floor

Scientific Program

9.15 Welcome

Prof. Alessandro Verri

9.30 Iterative algorithms for large size Least-Squares constrained regularization problems

Prof. Elena Piccolomini and Prof. Fabiana Zama

10.10 First link with Mario: need for stability

Prof. Pierre Sabatier

10.50 Mixture models and EM algorithms for radiographic images denoising

Prof. Alberto Borghese and Dott. Iuri Frosio

12.00 Some Fairy Tales from Sparseland

Prof. Christine De Mol

12.40 Remarks on Busemann equation

Prof. Giorgio Talenti

14.30 Solar Energy Prospects

Prof. Piero Salinari

15.10 Optimization approaches for image reconstruction on multiprocessor systems

Dott. Riccardo Zanella

15.30 Block coordinate gradient projection approaches for Nonnegative Matrix Factorization

Dott. Silvia Bonettini

15.50 Spectral Methods for Learning a Set

Dott. Ernesto De Vito
